

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
***Reporting Requirements Not Met for the Village of Union City***

*We are required to report the results of your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. While we collected our monthly total coliform sample on time, we did not report the results to the Michigan Department of Environment, Great Lakes, and Energy (EGLE) by the July 10, 2021, deadline for the June 1 to June 30, 2021, compliance period.*

**What should I do?**

There is nothing you need to do at this time. This is not an emergency. You do not need to boil water or use an alternative source of water at this time. The results of the sample were negative for bacteria. Even though public health was not impacted, as our customers, you have a right to know what happened and what we did to correct the situation.

**What happened? What is being done?**

While we collected the sample on time, we inadvertently missed reporting the sample results to EGLE by the required deadline. We are required to monitor total coliform by collecting one sample per month. We collected the required sample on June 1, 2021 but failed to report the result until July 28, 2021. We are making efforts to ensure this does not happen again. We have already returned to compliance.
